Summary

Software developer with experience in both front-end and back-end, currently focused on back-end development. Primarily working with Node.js, TypeScript, and NestJS to build scalable APIs and microservices. Also experienced in front-end development with Angular, which helps with full-stack collaboration and a better understanding of the overall product.

Professional Experience

Back-End Software Engineer

02/2025 – Present

Opsteam – Remote

- Responsible for designing and implementing scalable APIs using Node.js, increasing system reliability.
- Responsible for defining and applying coding best practices to ensure the project's scalability, maintainability, and long-term quality.
- Responsible to create E2E Tests to guarantee integrity.

Key Technologies and Tools: JavaScript, TypeScript, NodeJS, NestJS, REST APIs, PostgreSQL, Drizzle ORM, Swagger, Git, GitFlow, Docker, Modular Architecture, Clean Architecture, DDD, Clean Code, Design Patterns, SOLID, Vitest, Supertest, E2E Tests

Mid Back-End Developer

02/2025 – 09/2024

Revo – Remote

- Designed and implemented scalable APIs using Node.js, NestJS, and PostgreSQL, enhancing system reliability.
- Developed microservices architecture and using AWS services.

- Conducted code reviews to maintain high-quality standards, improving team efficiency and reducing defects.

Key Technologies and Tools: JavaScript, TypeScript, NodeJS, NestJS, REST APIs, Microservices, Swagger, Git, GitFlow, Jira, AWS Services, Prisma, PostgreSQL, Docker, Hexagonal Architecture, DDD, Clean Code, Design Patterns, SOLID, Scrum, Vue, Quasar Framework

Back-End Software Engineer

05/2023 – 01/2024

Agência de Dados – Remote

- Responsible for designing and implementing scalable APIs using Node.js, increasing system reliability.
- Responsible for defining and applying coding best practices to ensure the project's scalability, maintainability, and long-term quality.
- Collaborated with front-end person to resolve API integration issues, improving end-user satisfaction.

Key Technologies and Tools: JavaScript, TypeScript, NodeJS, NestJS, REST APIs, Swagger, Git, GitFlow, ClickUp, Azure DevOps, Prisma, PostgreSQL, Docker, DDD, Clean Code, Design Patterns, SOLID, Scrum

Mid Analyst Back-End Developer

03/2022 – 02/2023

Avanade – Remote

- Engineered back-end services with Node.js and NestJS, supporting high-volume transactions in a microservices architecture.
- Developed and tested GraphQL and REST APIs, improving data accessibility across systems.
- Wrote unit and integration tests using Jest, achieving 92% coverage.

Key Technologies and Tools: JavaScript, TypeScript, NodeJS, NestJS, Express, REST APIs, GraphQL, Microservices, BFFs, Git, GitFlow, Jira, Bitbucket, CI/CD, Jenkins, Unit & E2E Tests, Jest, Supertest, DDD, Clean Code, SonarQube, Design Patterns, SOLID, Kanban, TypeORM, PostgreSQL

Junior Back-End Developer

06/2021 – 02/2022

Avanade – Remote

- Built and maintained scalable back-end systems with Node.js, reducing technical debt through DDD and Clean Code principles.
- Wrote unit tests using Mocha and Chai, achieving 90% coverage.

Key Technologies and Tools: JavaScript, TypeScript, NodeJS, NestJS, REST APIs, Microservices, Git, GitFlow, Azure DevOps, Service Bus, Unit Tests, Mocha, Chai, DDD, Hexagonal Architecture, Clean Code, SonarQube, Design Patterns, Scrum

Junior Front-End Developer

06/2020 – 05/2021

Techdog – RJ, Brazil

- Developed web user interfaces with Angular and Bootstrap, improving application responsiveness and user experience.
- Developed mobile user interfaces with Angular and Ionic, improving application and user experience.
- Integrated REST APIs to enable dynamic front-end workflows.

Key Technologies and Tools: JavaScript, TypeScript, Angular 5 and 9, Bootstrap, Angular Material, Git, GitFlow, RESTful APIs, Ionic, Azure DevOps

Skills

Advanced:

NodeJS, TypeScript, JavaScript, NestJS, Git, Git Flow, HTML5, CSS3, RESTful APIs, Agile (Scrum, Kanban)

Intermediate:

PostgreSQL, MySQL, Prisma, TypeORM, GraphQL, Drizzle ORM, Java, Vitest, Jest, SQL, Azure DevOps, SonarQube, DDD, Clean Code, Microservices Architecture, Design Patterns, SOLID, Fastify, Jira, Express, BitBucket, Docker, Angular, Ionic

Beginner:

NoSQL, Redis, AWS Services, Golang, RabbitMQ, Kafka, MongoDB, VueJS, CI/CD, Jenkins, Mocha, Chai, Supertest, Kotlin (Android), Spring Boot, Azure Service Bus, Hexagonal Architecture, Clean Architecture, Modular Architecture

Education

Degree in Systems Analysis and Development

2019 – 2021

IBMR – Rio de Janeiro, RJ – Brasil

Technical Course in IT

2017 – 2019

Senac – Rio de Janeiro, RJ – Brasil

Languages

- Portuguese – Native
- English – Advanced
